Jacksonville/Duval County Market Value Analysis: Block by Block

Launch Meeting
February 14, 2023

About Reinvestment Fund

- We are a national mission-driven financial institution that creates opportunity for underserved people and places through partnerships. We marshal the capital, analytics, and expertise necessary to build strong, healthy, and more equitable communities.
- Since 1985, Reinvestment Fund has made **\$2.7 billion** in cumulative investments and loans.
- We are supported by **830 investors** that include individuals, foundations, religious institutions, financial institutions, civic organizations and government.
- How we work:

Lending and Investing

Policy Solutions

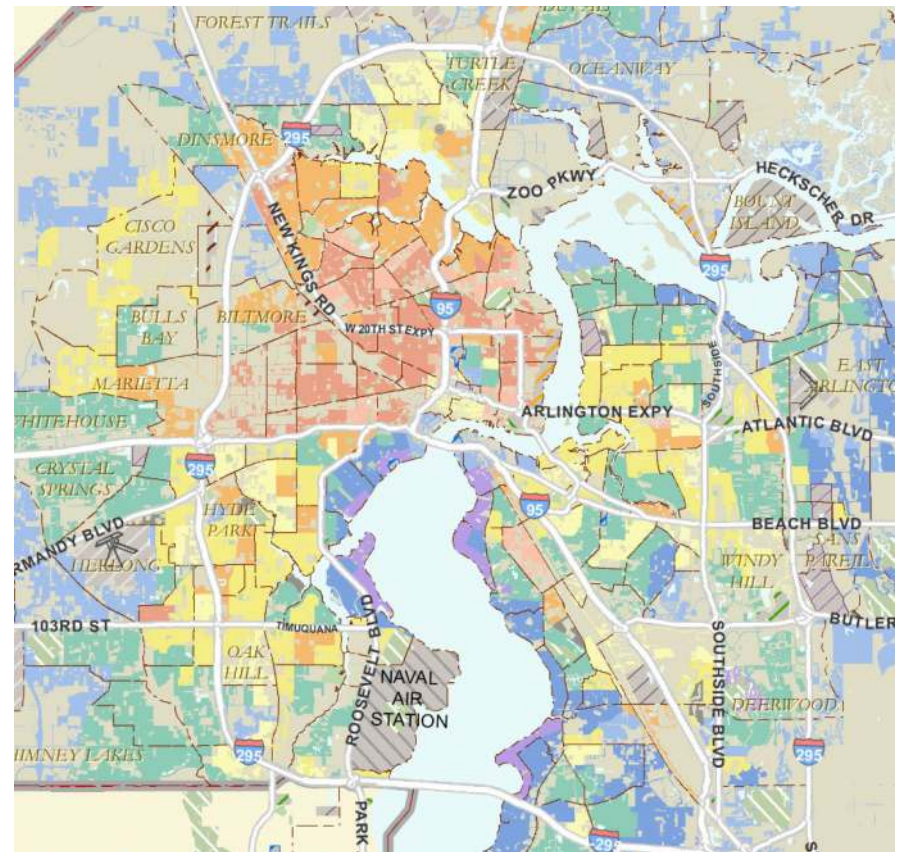

PolicyMap

The Market Value Analysis

The **Market Value Analysis (MVA)** is a tool to help residents and policymakers identify and understand the elements of their local real estate markets. It is an objective, data-driven tool built on local administrative data and validated with local experts.

With an MVA, public officials and private actors can more precisely target intervention strategies in weak markets and support sustainable growth in stronger markets.

MVAs in Action: How Cities Use the MVA

- Component of a local land banking strategy (Phila., NOLA, Pittsburgh, Wilmington)
- Guide capital budget (Detroit)
- Focus code enforcement (Phila., Baltimore, Indianapolis, NOLA)
- Benchmark quality of life measures (Phila.)
- Equitable development strategy (DE/DSHA)
- Target statewide Strong Neighborhoods Revolving Loan Fund (DE/DSHA)
- Inform LIHTC QAP (DE/DSHA)
- Develop CDBG ConPlan / Comprehensive plan (Detroit, Wilmington, St. Louis, Richmond, Dallas)
- Assessment of Fair Housing (Phila., Richmond)
- Assess changes in the market over time (Phila., Baltimore, Pittsburgh)
- Evaluate development opportunities (Pittsburgh, Phila., Houston, Detroit, St. Louis, cities in NJ)
- Target demolition and acquisition activities (Baltimore, Phila., Detroit, NOLA)
- Select transformative tipping point projects (Phila., Baltimore, Pittsburgh, NOLA)
- Engage partners – philanthropic, non-profit, government – in coordinated efforts to rebuild neighborhoods (Baltimore, Milwaukee, NOLA)
- Guide federal Neighborhood Stabilization Program Investment (States of PA & NJ, Houston, Detroit)

Our Normative Assumptions

When analyzing markets we begin with these principles:

- Public **subsidy is scarce**; acting alone, subsidies cannot create a market
- Public policy and subsidy must **leverage private investment** or create conditions for investment to occur
- In distressed markets, **build from strength** by investing near strong assets
- All **residents are customers** with an expectation of quality public services and amenities
- The best decisions are based on the sound and **objective analysis** of quantitative and qualitative data

The MVA Process

1

Acquire **local administrative data** and geocode to Census block group geographies.

2

Manually inspect and **validate data layers** by driving through the area.

3

Use statistical **cluster analysis** to identify areas with common attributes.

4

Manually inspect areas for conformity with **local experts** to assess fit.

5

Alter parameters; **re-solve and re-inspect** until model accurately represents area.

6

Summarize and describe the characteristics of each market.

Lessons from 15+ years of experience

Validating Data is Critical.

Researchers must systematically visit and observe neighborhoods in the city to understand the data and final model.

Geographic Scale Matters.

MSA and Census tract geographies are too large to accurately reflect the nuances of local real estate markets.

One Size Does Not Fit All.

MVA components and models share some similarities across cities but must be customized to the unique traits of each city.

Integrate Local Knowledge.

All models are tested with local experts to incorporate qualitative feedback from each geography.

Purple and Blue Markets

Block Groups	Median Sales Price	Variance Sales Price	Water Shutoffs (Vacancy)	Foreclosure Filings & Bank Registered Vacants	Homestead Exemptions (Owner Occupancy)	Publicly Subsidized Rentals	Residential Land Area	Permits > \$5,000	
A	57	\$556,000	0.58	0.1%	3.3%	73.6%	7.2%	66.4%	14.9%
B	95	\$301,000	0.33	0.3%	6.0%	77.6%	2.5%	77.2%	7.3%
C	70	\$270,000	0.41	0.2%	7.9%	81.9%	3.5%	32.2%	9.8%
Regional Block Group Average		\$242,000	0.42	0.9%	8.1%	56.6%	14.4%	59.1%	6.9%

Jacksonville MVA 2022 Final MVA

- A - \$556,000 (57)
- B - \$301,000 (95)
- C - \$270,000 (70)

Characteristics of Purple and Blue Markets

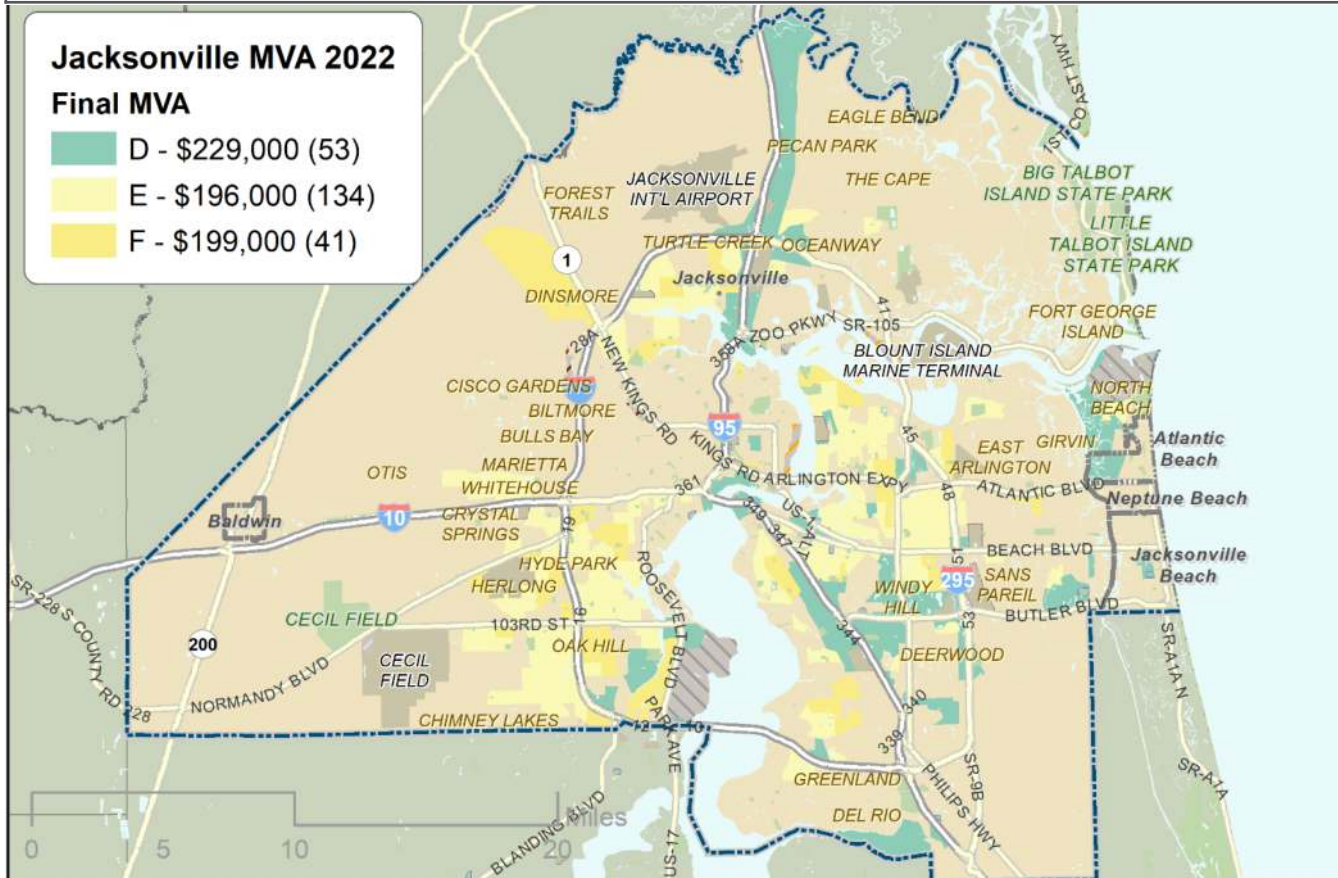

- Highest priced markets
- Mostly owner occupied
- High level of permitting
- Low levels of vacancy and foreclosure
- B markets have mostly Residential Land Use, C have a mix of uses

Green and Yellow Markets

Block Groups	Median Sales Price	Variance Sales Price	Water Shutoffs (Vacancy)	Foreclosure Filings & Bank Registered Vacants	Homestead Exemptions (Owner Occupancy)	Publicly Subsidized Rentals	Residential Land Area	Permits > \$5,000
D 53	\$229,000	0.37	0.3%	6.2%	26.2%	8.7%	27.4%	8.0%
E 134	\$196,000	0.35	0.5%	9.0%	53.8%	6.4%	72.8%	5.1%
F 41	\$199,000	0.35	0.6%	11.0%	52.8%	73.4%	56.8%	6.0%
Regional Block Group Average	\$242,000	0.42	0.9%	8.1%	56.6%	14.4%	59.1%	6.9%

Jacksonville MVA 2022 Final MVA

- D - \$229,000 (53)
- E - \$196,000 (134)
- F - \$199,000 (41)

Characteristics of Green and Yellow Markets

- Sales prices are just below average
- D markets are mostly renter occupied
- E markets have typical values in most measures
- F markets have high levels of rental subsidy

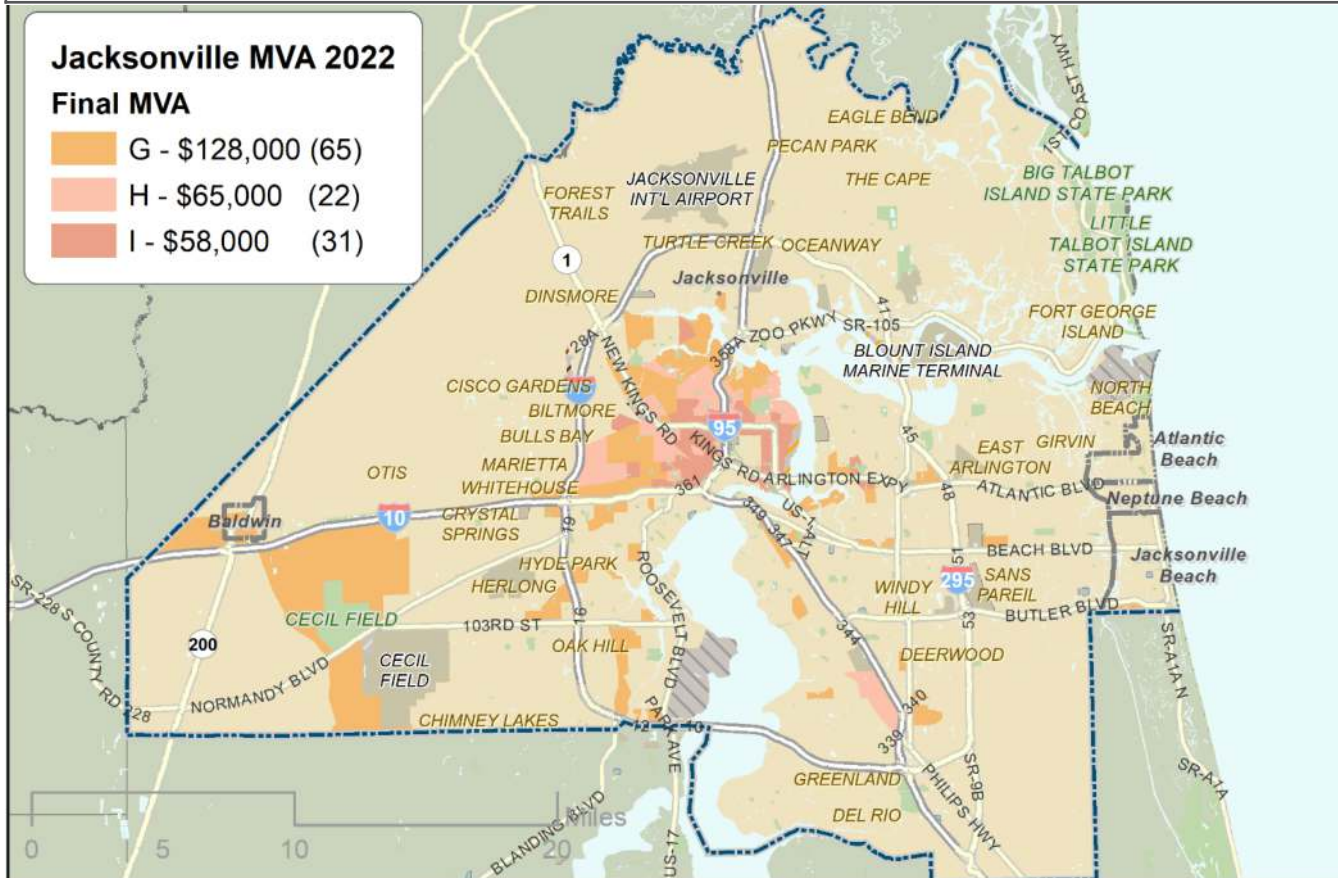

Orange and Salmon Markets

Block Groups	Median Sales Price	Variance Sales Price	Water Shutoffs (Vacancy)	Foreclosure Filings & Bank Registered Vacants	Homestead Exemptions (Owner Occupancy)	Publicly Subsidized Rentals	Residential Land Area	Permits > \$5,000
G 65	\$128,000	0.47	1.2%	11.6%	42.6%	11.3%	61.6%	3.0%
H 22	\$65,000	0.62	3.7%	11.0%	25.1%	76.9%	37.8%	2.6%
I 31	\$58,000	0.67	6.2%	10.0%	24.9%	17.5%	57.8%	2.7%
Regional Block Group Average	\$242,000	0.42	0.9%	8.1%	56.6%	14.4%	59.1%	6.9%

Jacksonville MVA 2022

Final MVA

- G - \$128,000 (65)
- H - \$65,000 (22)
- I - \$58,000 (31)

Characteristics of Orange and Salmon Markets

- Lowest priced markets
- Higher than average levels of vacancy and foreclosure
- H and I markets are mostly renter occupied
- H and I markets have widest variation in sales prices
- Low levels of permitting
- Most renters in H markets are subsidized
